Seasonal Travel Guide

Guarding their secrets in an icy grip for most of the year, Antarctica is a spectacle waiting to be revealed.

To help you decide what time of the year is best for you, here are some seasonal highlights in Antarctica to look forward to:

November – December

Penguins court, nest, and incubate eggs. Chicks hatch in mid to late December, while whales, like Minkes and Humpbacks, arrive for feeding under almost 24-hour daylight. In South Georgia, King penguins balance eggs on their feet, and albatross reveal their gawky, gorgeous chicks.

January – Early February

Peak season on the Antarctic Peninsula presents bustling penguin rookeries and lounging seals. Ice retreats, opening up the Antarctic Circle and the Weddell Sea. Adolescent chicks fledge and are curious, often approaching visitors. The days are long, and temperatures rise above 5°C, the warmest of year.

Almost entirely covered in thick, permanent ice, East Antarctica and the Ross Sea are only accessible during mid-December to January, with just three departures each season. The coasts of East Antarctica and the Ross Sea are home to seabirds, penguins, and seals, which feed in the surrounding ocean, including the Emperor penguin.
